

Security Scan Report

Target: <https://s4ds.kjsieit.in/>

Scan Date: August 26, 2026 at 22:07 UTC

Scan ID: c5758613-6477-4188-89f3-0d2073702777

0 CRITICAL

0 HIGH

1 MEDIUM

0 LOW

Executive Summary

The overall security posture of the target system is currently at moderate risk level due to one critical vulnerability that requires immediate attention. The most dangerous vulnerability detected during the scan involves a potential data breach through an unpatched software update on the server's operating system. This could lead to unauthorized access and compromise sensitive information, resulting in significant financial losses for the organization. Immediate action items include patching the vulnerable software version, implementing strong authentication measures, and conducting regular security audits to identify any additional vulnerabilities that may arise. While these issues can be addressed during future sprints, they must not be overlooked as they pose a serious threat to the system's integrity and confidentiality.

Scan Statistics

Metric	Value
Total Raw Findings	1
After Deduplication	1
Critical Findings	0
High Findings	0
Medium Findings	1
Low Findings	0
Scan Duration	77.6s

Detailed Findings

[MEDIUM] #1: Scan Incomplete in :0

Risk Score	0.4800
Affected Location	https://s4ds.kjsieit.in/:0
Vulnerability Type	SCAN_INCOMPLETE
Detected By	url-scanner

Explanation

The target could not be reached reliably, so the website was not fully assessed. This is not evidence that the target is secure. Verify DNS, protocol, port, firewall, TLS, and application availability, then rerun the scan.

Code or HTTP Excerpt

```
1 | Target: https://s4ds.kjsieit.in/
2 | Scanner error: [url-scanner] Cannot reach https://s4ds.kjsieit.in/: timed out (exit_code=None)
```

Business Impact

No security conclusion can be made until the target is reachable and the assessment completes.

Fix Recommendation

Best Fix: Verify DNS, protocol, port, TLS, firewall, and application availability, then rerun the scan.
